10/176,367. The Examiner indicated that the claims would otherwise be subject to an obviousness-type double patenting rejection.

In order to expedite prosecution, Applicants have submitted herewith a terminal disclaimer listing co-pending application 10/176,367. Applicants respectfully submit that the terminal disclaimer is submitted only to bring the lengthy prosecution in the subject application to a close; the claims of the subject application remain patentable over claims in co-pending application 10/176,367. Particularly, the claims in the subject application and the co-pending applications recite recording media with significantly different storage schemes and data content imparting different functionality to reproducing and recording devices interacting with the same. Without some other reference accounting for the differences between the claimsets and providing some rational underpinning for combining the claimsets, neither claimset is obvious over the other. Allowance of the present application is respectfully requested.
